

# 4-5 NOV TURNING POINTS

FRI 4 NOV + SAT 5 NOV

Come and join us for  
**Light Up Lancaster 2022**  
– a magic carpet ride through  
space and time!

Light Up Lancaster artists will transport you on a magical journey of discovery with their fun, playful, fantastical and inspirational creations. And, with this year's theme of Turning Points, they will shed a brilliant light on moments of ponder.

The programme ranges across the city centre and takes in locations new to the festival such as Kanteena and St John's Church.

The performances, activities and installations in the city centre are all FREE – just turn up and enjoy! The art installations (unless otherwise stated) run from 5pm on Friday 4 November and Saturday 5 November.

And at 8pm on the Saturday the skies above the city will once again be ablaze with the culmination of the festival – a stunning fireworks display launched from the grounds of Lancaster Castle.

Design by www.robinzahler.com

# FIREWORKS VIEWING AREAS

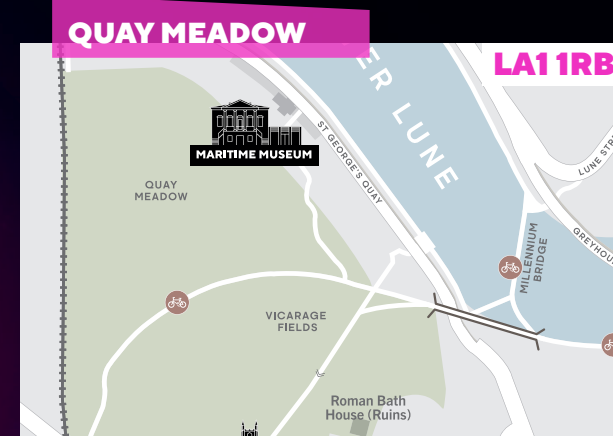

SAT 5 NOV - 8PM

Arrive at Giant Axe or Quay Meadow between 6.30pm and 7.40pm – there'll be fun and food stalls while you wait!

There are limited numbers of wristbands for each official viewing location but if you don't manage to order any, don't worry – if you can see the castle, you can see the fireworks!

This viewing area is situated in Lancaster City Football Club and is very near to the railway station. Mostly grassed; some hardstanding areas suitable for wheelchair users and limited accessible parking (please call 01524 582394 in advance).

This grassed viewing area is situated behind St George's Quay and can be accessed by walking along the quay from the city centre (no parking available).

A relaxed and quieter viewing location with stunning views across the city. Wristbands not required; no music at this location but the cafe will be open for hot food and drinks. Limited parking available.

# LIGHT UP THE NORTH

Light Up Lancaster is a member of Light Up The North, a network of festivals taking place across the north of England.

#### NEW STREET

**ONE WAY OR ANOTHER** by Tom Biddulph  
co-commissioned with **Lightpool** and **Wigan Council**

A set of revised road signs giving humanity a shared direction: don't give up on future generations. Work together, keep the faith. You can't stop hope. Tom Biddulph enjoys looking slightly past reality and imagining what's there, often resulting in concepts that relate to a particular place or environment.

#### SUN SQUARE

**WE RAVE** by Ludus Dance and Night People

Inspired by rave culture, WeRave makes up for the coming-of-age rituals missed during Covid-19. Watch as Ludus Youth Dance Company and guests perform choreography created with Night People – and then join in and reminisce!

#### MARKET SQUARE

**WAITING FOR A MESSAGE FROM HOME** by Shane Johnstone and Anna Read

Live, evocative music and beautiful imagery create a moving tale of the resilience of the human spirit. Inspired by the 'Hinge of Fate' museum exhibition and supported by the Heritage Fund.

#### HERBARIUM

**PHOTOSYNTHESIS: TURNING LIGHT INTO LIFE**

by Tamara Hernandez-Verdeja

At Lancaster Environment Centre, we work to build a better future by understanding photosynthesis to increase crop yield. Come and discover how plants use sunlight to sustain life.

#### THE CORNERSTONE

**STORING UP THE FUTURE** by Valerie Seymour

A great opportunity for everyone to join in the Royal Society of Chemistry Global Experiment for 2022. Have fun learning why energy storage is important - how and where energy sources are used and why sustainable sources of energy are so vital. A hands-on and enlightening experience.

#### LANCASTER CASTLE

**100 STORIES HIGH** by imitating the dog  
with James Hamilton co-commissioned with **Lightpool**

As a man leaves his house for the final time, a flood of memories unfolds. Personal moments collide with world events as the old building shows its history and bares its soul. **imitating the dog** mix beautiful animation with live performance in a musical installation about memory and time.

#### PRIORY CHURCH

**SHIP OF THE GODS** by Heinrich & Palmer

Inspired by the Norse myth of Skidbladnir, a magical shape-shifting vessel, this piece uses 3D laser scanning technology, film and lighting effects to re-imagine Skidbladnir through the scanned forms of life size boats to create an ephemeral vessel of light, which, like the mythical ship, has the ability to transform.

#### UPPER CHURCH ST

**ONCE WE WERE WATER** by idontloveyouanymore  
co-commissioned with **Quays Culture's Lightwaves**

In this new artwork by idontloveyouanymore, a digitally recreated river flows over you like rivers of the past and springs to life under your movements. In a digital age where rivers have stopped flowing, how will they be remembered?

#### JUDGES' LODGINGS

**CHIRAL MOLECULES** by Luis Pinho

Ever heard of molecules that can make light rotate? Chiral molecules can be found in our food (sweet and sour), our bodies (DNA), in medicines, and even in rocks... Chirality can be the difference between life-saving and life-threatening!

#### STOREY COURTYARD

**VOICING SILENCE** by Lou Chapelle

Created collaboratively with artists and Global Majority groups in the North West, this holographic video asks: How do we resist this loss of diversity, language, culture, and way of life? How do we care for and celebrate what we still have?

#### AUDITORIUM

**LET IT GLOW** by Lancaster + Morecambe Makers

Join in the fun of tinkering and experimenting with light, colour and ideas – come and create interesting light art with fluorescent paints and lava lamps with the LAMM team of innovators and wondrous makers!

#### WRITING ROOM

**NORMAN** by Monomatic, SHINE Artist '22 with Light Up The North

Meet the interactive light and sound installation NORMAN - an old-school 'smart' screen but with attitude. Its questionable antics might be understood as the response of an 'intelligent' machine in crisis.

#### LECTURE THEATRE

**KALEIDOSCOPE OF SUNSETS** by Jamie Dumayne and Brenda Zambrano

Be captivated by the wildly varying sunsets of the planets: from light brown on Venus to vivid blue on Uranus and bright orange on Saturn's moon Titan. Film, spectral lamps and scientists will explain these colourful phenomena.

#### STOREY GALLERY

**DRUM + DANCE** with Preston City Mela

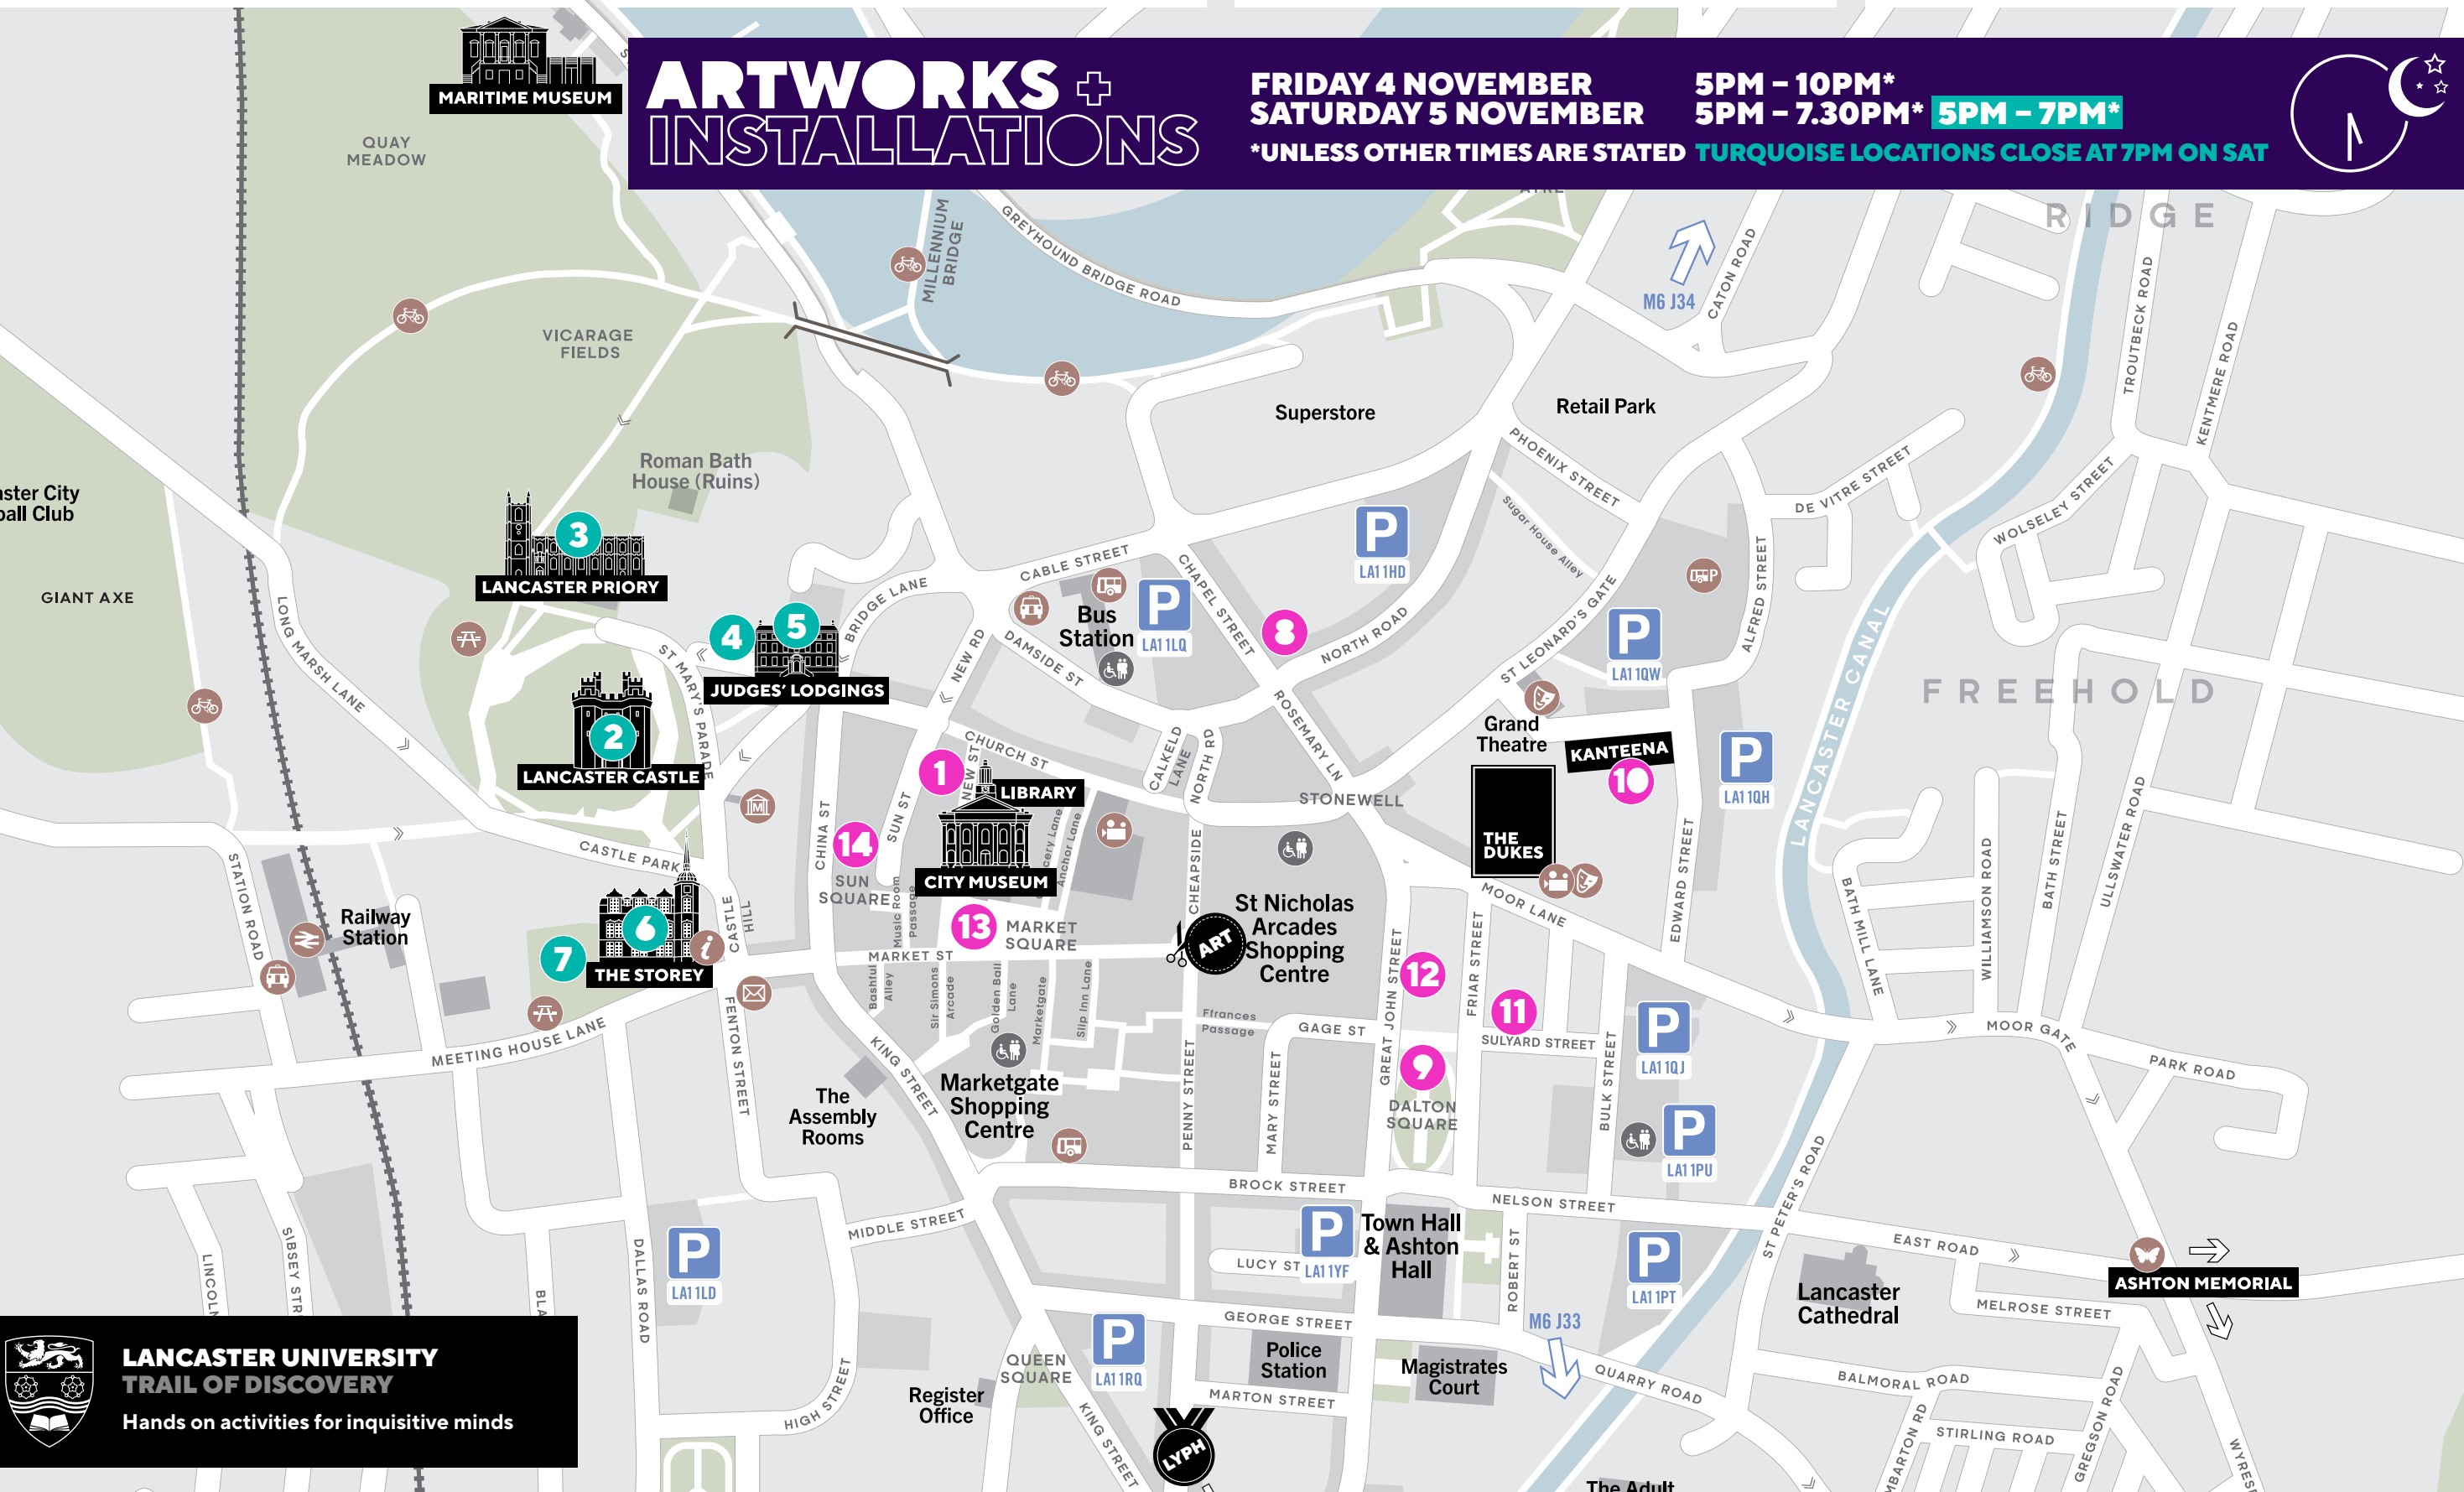

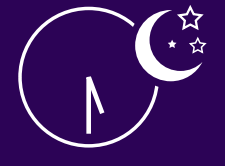

For one night only (Friday 6.30pm – 9pm) the marvellous Mela team will captivate audiences with their distinctive, joyful, live performances of dance and music. Unmissable!

## ARTWORKS + INSTALLATIONS

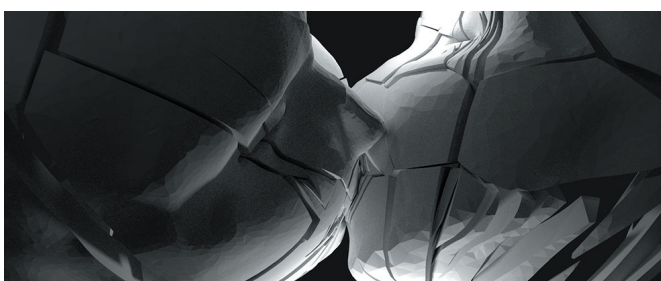

FRIDAY 4 NOVEMBER  
SATURDAY 5 NOVEMBER

\*UNLESS OTHER TIMES ARE STATED **TURQUOISE LOCATIONS CLOSE AT 7PM ON SAT**

5PM – 10PM\*  
5PM – 7.30PM\* **5PM – 7PM\***

**LANCASTER UNIVERSITY**  
**TRAIL OF DISCOVERY**  
Hands on activities for inquisitive minds

#### KANTEENA

**ECLECTIKA - LIGHT ART JAM** by Sumit Sarkar and Ash Murphy

Light art meets digital art meets electronica in this fantastical, unique event. Eclectika is a feast for the imagination, incorporating projection, virtual reality, digital wizardry and electronica: an immersive, evolving experience! Kanteena will also be serving up a warm welcome with food, fun and a place to rest.

#### DALTON SQUARE

**PEOPLE OF LANCASTER** by Josef Lepša with Studio 3dsense

A terraced house in Dalton Square is brought to life through a large-scale interactive projection. 27 unusual stories are hidden behind each of the windows - waiting to be discovered. This colourful collage playfully recalls the notable people who have made an enduring mark on the history of the district.

#### ST JOHN'S CHURCH

**BUTTERFLY DREAM: MAKING THE INVISIBLE VISIBLE** by Anne Bennett, SHINE Artist '22 with Light Up The North supported by Historic England Mill Race Cultural Programme

Specially created for St John the Evangelist Church, Anne's aim is to enable people to reflect on life by gazing at the many butterflies she has hand-made from bio-resin. Under UV light, each butterfly shines brightly with a unique design.

#### STOREY GARDENS

**THE NECTARY** by Alison Smith and Dr Chris Hassall

The Nectary invites you to mimic a pollinating insect, visiting six huge glowing flowers handcrafted from recycled materials. Created by artist Alison Smith and scientist Dr. Chris Hassall, this light and sound installation explores what we can gain from listening to nature, and the vital role pollinating insects play in our survival.
